## **TITAN Technology Partners Reports 52% Revenue Growth for 2006**

CHARLOTTE, NC - (January 19, 2007) – TITAN Technology Partners, a leading provider of enterprise hosted and managed industry solutions, today announced it achieved record 2006 performance with 52% revenue growth over 2005. Additionally, TITAN opened a third TITAN Center of Excellence in Cincinnati, completed a SAS70 Type II audit to satisfy TITAN's clients' need to comply with Sarbanes-Oxley requirements and successfully went live with 15 significant client projects.

“We exceeded our growth objectives in 2006. Revenue growth was primarily organic, but was supplemented by the acquisition of SAP Services Providers Titanium Consulting Group in January and Integration Associates, Inc. in September which filled out our SAP practice. Both acquisitions have been successfully integrated into TITAN,” stated TITAN Technology Partners' CFO Thomas Miklich.

“2006 was a tremendous year for our company and we will continue to invest in expanding our capabilities to better serve our expanding client base. We remain focused on becoming the leading provider of outsourced industry solutions in North America for middle market companies,” stated Michael Vadini, CEO of TITAN Technology Partners. “We will continue to look for acquisition opportunities which strengthen our ability to provide our customers with industry specific hosted and managed solutions.”

### **About TITAN Technology Partners:**
